LACH DIAMOND

75 years of diamond technology

With a tradition of diamond tooling in the family, **Lach Diamond** celebrates 75 years in the industry, and offers a range of custom made diamond tooling, Diamond disposable diamond tooling, grinding machines and a quick turn-around re-sharpening service. Diamond tools cover scoring tools, saws, hogging heads, jointing cutters, groove and profile cutters. CNC-controlled sharpening and grinding is automatic, tooth by tooth, according to the Lach-EDG process. With the measuring computer **X 9000**, all Lach Diamond spark erosion grinding machines are CNC-qualified.

Lach Diamond on site at Ligna '97

A number of major companies in Asia are already using diamond tools from Lach Diamond, and a total of five grinding CNC machines have been sold in Korea and two in Taiwan. Lach Diamond has had an agent in Korea for three years now, and is now looking to Singapore for further expansion.
