PCD- and CBN-tipped engraving tools...

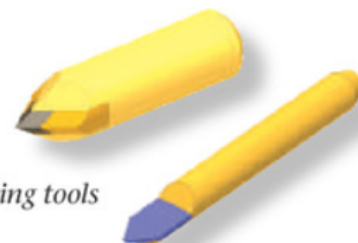

■ ...for the stamping technology sector, the packaging and printing industry. This is another product from LACH DIAMANT Germany - highly precise and wear-resistant.

Engraving tools tipped with PCD or CBN cutting materials enables competitive machining strategies of processing magnetic flexible dies as well as cutting rotors made of high-quality challenging materials. Other applications are for example scoring of PCB (electronic industry) as well as engraving of high-tensile and wear-resistant materials.

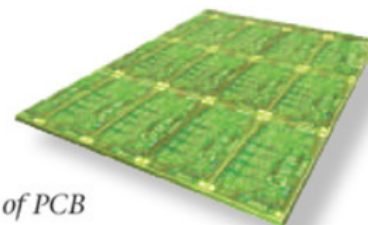

LACH DIAMANT offers PCD- and CBN-tipped engraving tools in standard or customized dimensions as semi-finished or finished (incl. side-cut) with highest reachable surface qualities *Made in Germany*.
