

LACH DIAMANT

PRÄZISION IST UNSER HANDWERK

»Ce-B tressex«

Crank- and Camshaft Grinding High Speed Grinding with CBN

- Newly developed recrystallized vitrified bond »Ce-B tressex«
- High productivity with grinding speeds up to $V = 125$ m/s
- Microcrystalline CBN with high stock removal rate
- CFRP¹-body with outstanding properties
- Extreme wear resistance

Steel body

- ✓ lower cost
- ✓ excellent Heat dissipation

CFRP¹-body

- ✓ vibration dampening
- ✓ low grinding noise
- ✓ thermal expansion coefficient is nearly zero
- ✓ no dimension correction
